Whilst WilsonStone cc endeavours to meet customer expectations, colour of products and colour consistency within products supplied by WilsonStone cc cannot be guaranteed due to the natural colour and aggregate size variation of the sand used to produce the relevant products. Samples if provided can therefore only be used as indicators of texture.
FEET
Feet raise the planter off the floor and facilitate easy drainage and cleaning.

DRIP TRAYS
Our standard drip tray is the same size as the base of the planter. The planter stands on top of the drip tray. This maximizes the amount of water the drip tray holds and prevents the planter from being stained by the water in the drip tray.
